

Team Bed Back & Beyond
Progress Report Period 2/8/2007-2/22/2007
Submitted 2/22/2007 by Angie Baltz

Angie Baltz
Chris Heintzelman
Rob MacArthur
Magdalen Obiefule

Current Status/Work: We've received our clinometer, and Chris has made major headway on programming the joystick output. We're picking up a working hospital bed from SLUH this afternoon (2.22.07) and will begin stripping down the controls next week.

Future Work: Testing components (servos, actuator)
Constructing the apparatus to apply feedback to the joystick.
