

Team Name: “Bed, Back and Beyond”

Project Title: Accessible Power-Assist Hospital Bed Back Angle Controller

Angela Baltz

Chris Heintzelman

Robert MacArthur

Magdalen Obiefule

Current Status:

- Thus far we have met all deadlines set by our team and the instructor. We are on track to successfully complete the preliminary requirements for our project.

Work Completed:

- Preliminary research
- Received quotes on multiple part possibilities
- Reported for progress presentation

Current Work:

- Part Specs:
  - List of most parts has been formulated however variations of each part have pros and cons. These different attributes need to be weighed in order to choose the best possible part for a reasonable price.
- Divide work into segments for each team member to accomplish

Future Work:

- Team members need to spec and determine parts according to their individual task
- Order parts (before Thanksgiving break)
